
Gira G1 Release Notes

Firmware version: 3.4.51

Gira Project Assistant (GPA) version: 4.7 or higher

We recommend that you always use the latest available GPA version.

New functions

- Adaptation to the new functions of the Gira X1 Version 2.7.585

Fixed bugs

- Malfunction of the controller with new date & time telegrams in quick succession

Known Home Server Client restrictions

- No timer configuration (bug fixes in HS Experte 4.11)
- Direct plug-in switchover (plug-ins are only available via menu tiles)
- Diagram plug-in: Switching over the hour/day/week/month/year
- Camera plug-in: Display of buttons
- Calling up third-party apps (e.g. Revox)
- "Shake" and "Click sound" menu items have no function
- Evaluation of the Gira G1 temperature sensor module not possible
